24–26 March 2025
The African Leadership Center
Mauritius

Team SYNthesis (Mauritius & Africa) Ltd is pleased to invite you to attend an intensive **Cost Management Masterclass** on **24-26 March 2025** at **The African Leadership Centre, 4A Hitchcock Avenue, Quatre Bornes, Mauritius.**

About the Chief Instructor:

Mr. Tan Chee Peng is the founder and CEO of **Team SYNthesis (TS)** and **Business Technovise International (BTI)**, a strategic services firm specializing in Business / IT Strategy, **Programme & Project Management (PPM, PMO & IQA Advisory)** of large implementations and business process integration projects.

Since the global financial crisis, organisations are seeking **greater gold-standard confidence** from investment proposals and decisions. Traditionally, the complexity of scope and other elements add challenges to defining an accurate prediction of cost for planned initiatives. **56% projects have been cancelled or are seen as a failure because they ran too far over budget.** This intense 3-day Cost Management Masterclass provides *strategy, proven techniques and tools* through interactive dialogue and PMIS-centric exercises on how to be effective in preparing, planning, budgeting, spending and controlling project-based cost expenditure.

This Masterclass is designed to improve your business and project-based cost outcomes through better awareness, analysis, application of skill and process that is supported by strong technique and proven tools. The Masterclass will be especially relevant and useful to *senior programme and project resources, line managers, cost estimators and project controls specialists in addition to those seeking to advance their career in those areas.*

It will provide an in-depth analysis of Project Cost Management from the prioritization & initiation stages through to project cost close-out at the end of your initiative. The content applies equally to small as well as large initiatives with differing degrees of complexity.

Translating Theory into Practice?

This highly interactive and intensive training course provides attendees with the latest practices, tools and techniques. Our format combines real-world practical case study examples, hypothetical scenarios, group exercises and tutorial style presentations with a focus on collaborative and interactive learning, including 1-1 reviews.

Managers and customers expect to get value for money from this 3-day Masterclass as it will present the participants with straightforward approaches to developing a cost baseline and setting up a cost tracking system so that the budget is well managed during the project's life cycle. The Masterclass will cover:

1. The PMI PMBoK global standard for managing projects (5th Edition)
2. Estimating cost techniques, including the Work Breakdown Structure, Work Packages and Risk Management considerations
3. The S-curves for risk and cost estimates
4. Control accounts and change control
5. Earned Value Management, performance variances and management recovery options.

Target Audience:

This course aims at empowering the Program managers, Project managers, Operations managers, Senior Engineers, Team Leaders, managers and others who want to apply best practices for **Cost Management**. This is the **fourth** of 10-part knowledge areas to develop high performance teams that can drive initiatives to successful completion and obtain the desired organization outcome. **Certified PMs will find the missing links in their PPM practices and relish its inherent challenges.**

The course is very demanding, inevitably it will force the participants out of their comfort zone in order to climb the next S-curve. All participants **should have** a laptop (with **WIFI Connections**) in order to take part in the exercises and read the course notes provided in PDF format.

Apart from being an invaluable knowledge enriching experience, the Masterclass on Risk Management has broadened my views and has enhanced my way of doing things.
